

TWISTER

3" & 4"
Corrugated
Grain Storage

Storage & Accessories

Twister Premier Grain Storage & Accessories Since 1976

World Class Manufacturing & Design

Twister's bin manufacturing facility employs the most advanced roll-forming equipment. Designed with end-user satisfaction in mind, our bins assemble quickly and easily without sacrificing strength and quality.

Twister bins stand up to the elements. Our 4" corrugation bin line-up offers more flat bottom storage capacity than ever before and features a unique ½" corrugation depth and 3" high roof rib design, ensuring industry leading strength and stability.

All Twister bins feature a standard galvanization level of G115, offering 25% more protection than the industry standard, G90. Our stiffeners are roll-formed deep, galvanized, lipped hat sections for maximum strength.

We are committed to innovation. Our latest design improvements include Twister's concrete foundation system and unique variable strength roof loading design.

Twister offers a complete range of flat and hopper bottom grain bins from 1,662 to 684,240 bushels

Corrugation Line

Floor Line

State-of-the-art technology

Punch-Curve Line

With more than 100,000 fans in operation Grain Guard remains the leader in aeration design

The Complete Package

Since its inception in 1976, Twister has become a leading manufacturer of flat bottom and hopper bottom grain bins in Canada, the Northern United States, Australia and other markets around the world. We offer a complete line of narrow and wide corrugation grain bins to suit any application.

Twister recommends Grain Guard aeration equipment to complement your grain storage system. Grain Guard offers over 40 years of experience producing industry leading aeration equipment and fans. The primary purpose of aeration is to control the temperature of the grain while preventing spoilage. This allows high moisture grain to be stored safely until it is convenient to be dried – even well after harvest has been completed.

The combination of grain storage equipment from Twister, and aeration equipment line-up from Grain Guard provides an effective product mix for your operation's performance and profitability.

Grain Guard In-Line Centrifugal

Grain Guard High Speed Centrifugal Fans

Grain Guard Low Speed Centrifugal Fans

Grain Guard Next Generation Rocket

Twister Bigger & Better

4" Wide Corrugated Grain Bins

Flat Bottom See pages 10 - 20 for specifications

Roof Design

- Corrugated with 30-degree roof slope on all models
- 3" high multi-step roof rib
- Pre-punched rolled edge flange for round or gooseneck roof vents
- 40" filler cap opening with remote opener
- Additional rib stiffeners available for higher snow loads, higher peak loads or temperature cable loads

Ladder Design

- Optional outside and inside ladders available
- Outside ladder includes safety cage for bins 6, 7 and 8 tiers high
- Outside ladder includes safety cage and platform for bins 9-12 tiers high

Twister's 4" wide corrugated grain bins are available in capacities up to 684,240 bushels

TWISTER 

A complete line-up of features and options allow you to create a custom grain storage system to suit your farming operation

Bin Unload

- High capacity 11" U-trough unload
- 8" or 10" tube unload
- 7" power sweep
- Large center hoppers
- Pre-positioned intermediate hopper
- Incline, vertical or horizontal powerheads available

Stiffeners

- Complete catalogue available as stiffened or unstiffened
- Roll-formed deep, galvanized, lipped hat sections for maximum strength
- Standard stiffeners are 88" and cover two rings; special top stiffeners are shorter to accommodate the wall height
- All stiffener material is ASTM 653, Grade 50, Class 1

Full Floor Aeration

- Easy to install full floor aeration
- Available in 18 and 20-gauge
- 7" wide lanced planking with 12% open area
- 13" and 17" floor supports available

Door

- A large walk door, 64" x 30" standard on unstiffened and stiffened bins up to 60'
- Three heavy-duty inner panels to allow easy access to the bin
- A single pin door is used on 15' to 30' bins and a double pin door is used on series 33' and larger
- Heavy-duty frame maintains the bins side-wall integrity
- Optional auger chute available in bins up to 7750 bushel (260 m³) capacity

Hopper Topper

See page 22 for specifications

4" Corrugated Hopper Topper

Twister also offers a line-up of new 4" corrugated hopper toppers designed to fit 15', 18', 21', 24' and 27' hopper bottoms. With capacities reaching over 18,000 bushels, these new hopper bins are a great storage asset to any farming operation.

Twister's 3" Corrugated Flat & Hopper Bottom Grain Bins

Flat Bottom

See page 21 for specifications

- Exterior stiffeners
- Exterior sidewall ladder and safety cage
- Saf-T-Fill bin level indicator
- Roof manhole
- Remote lid opener
- All painted components are powder coated
- Rectangle door is standard on 14' to 32' diameter bins
- Round door is standard on 38' and 44' diameter bins

Optional Accessories:

Clean Sweep Unloading System

- 11" U-trough system available for 25'- 44' diameter bins
- Comes complete with gear driven 7" bin sweep for easy cleanout

Full Floor Aeration

- Easy to install full floor aeration
- Available in 18 and 20-gauge
- 7" wide lanced planking with 12% open area
- 13" and 17" floor supports available

Ladder

- Standard outside ladders and optional inside ladders available
- Outside ladder includes safety cage for bins 7-12 tiers high

3" narrow corrugated flat bottom bins are available in sizes 14' through 44' and 1,662 to 52,750 bushel capacities

3" narrow corrugated hopper bottom bins are available in capacities from 1,967 to 9,454 bushels

Hopper Bottom

See page 23 for specifications

We don't just give you the best looking hopper bottom grain bins in the industry; we make them the easiest to use as well. The hopper slope is a full 40-degrees with a rack-and-pinion gate for easy clean out.

- 40-degree slope cone
- Rack-and-pinion slide chute
- Remote lid opener
- Bolt together cones for easy transport
- 25" hopper clearance
- External stiffener
- Manholes in roof and hopper cone
- All painted parts are powder coated

Optional Accessories:

The Next Generation Rocket

Grain Guard's Next Generation Rocket aeration system promotes maximum airflow through all areas of the hopper bin to preserve your investment and provide consistent grain conditioning.

Steel Skid Foundation

Twister offers a multi piece two beam foundation skid for use on 14' and 19'. A three beam foundation is offered on 22' Twister hopper bins installed on a gravel pad. Because they are a multi-piece design, transportation is hassle free.

Large and easily accessible hopper cone manhole.

Rack-and-pinion slide gate for easy clean out.

Grain Guard

Aeration & Conditioning

Aeration & Conditioning Systems

High Speed Centrifugal Fans

- Available in 3-10hp sizes
- Adapts to most aeration systems
- Precision balanced steel fanwheel ensures maximum airflow and efficiency
- Enclosed, fan-cooled motor
- Weather-proof electrical controls

Low Speed Centrifugal Fans

- 1750rpm, available with or without controls
- Totally enclosed, fan-cooled motor
- Balanced, powder coated, seam welded, steel centrifugal wheel
- Adjustable feet

Helper

- The Rocket penetrates the center of the bin, forcing air into the core of the grain mass
- Floor ducts push air down towards the floor and out towards the bin walls

Axial Fans

- 3450rpm, available with or without controls
- Galvanized control box
- Balanced, cast aluminum blade with airfoil design
- Air-over cooled motor

Twister recommends Grain Guard's established catalog of aeration and conditioning equipment for your grain storage management

In-Line Centrifugal Fans

- Available in 3-10hp sizes
- 18", 24" and 28" diameter openings
- Precision balanced steel fan wheel ensures maximum airflow and efficiency
- Aerodynamically designed inlet cone
- Weather-proof electrical controls
- Air-over cooled motor

Straight Duct

Available in 18" and 24" diameters, the Grain Guard Next Generation Aeration Tube is ideal for conditioning and cooling grain. The new design includes laser-cut internal rings providing increased strength, as well as downward facing louvers that provide improved cleanout. The Next Generation Aeration Tube is also now available in 3', 4', 6', 7' and 8' sections that will adapt to more hopper bin diameters.

You invest in a bin to protect your product from the elements, but what is guarding your grain from spoilage on the inside?

Rockets

The Next Generation Rocket

Grain Guard's experienced research and development team has innovated the Rocket Aeration System, yet again. The improved Next Generation Rocket Features:

- Smooth louvered surface allows for cleaner unloading
- up to 8% more surface area than the Classic Rocket
- Improved performance through re-design to provide more air delivery to the center of the hopper, where air is most difficult to move
- Reduced weight, redesigned side legs and internal support rings provide greater structural strength, up to 125% greater than the Classic Rocket
- Improved design results in increased vertical loading up to 30' in grain height, up to 40' on commercial rocket systems
- 3 leg design provides better stability in the bin
- The Next Generation Rocket is a result of 5 years of field testing

The Retro Rocket

Hopper bottom bins without aeration?
It's not too late to dry your grain!

The revolutionary Retro Rocket, the only do-it-yourself rocket system that allows you to retrofit existing hopper bottom and smooth-walled bins with farm proven Grain Guard aeration.

RETRO ROCKET™
Making Sense of Rocket Science.

Retro Rocket Unfold Sequence

Slide Retro Rocket through manhole

Suspend Retro Rocket by winch inside hopper

Unfold Retro Rocket

Easy two-person install

NOTES

1. Grain bin volumes and capacities based on ASAE S413.1 DEC97.
2. Volume based on 28-degree angle of repose in roof, filled to a height 25 mm (1") below the eave height.
3. Bushel capacity is compacted 6%.

NOTES

1. Grain bin volumes and capacities based on ASAE S413.1 DEC97.
2. Volume based on 28-degree angle of repose in roof, filled to a height 25 mm (1") below the eave height.
3. Bushel capacity is compacted 6%.

NOTES

1. Grain bin volumes and capacities based on ASAE S413.1 DEC97.
2. Volume based on 28-degree angle of repose in roof, filled to a height 25 mm (1") below the eave height.
3. Bushel capacity is compacted 6%.

NOTES

1. Grain bin volumes and capacities based on ASAE S413.1 DEC97.
2. Volume based on 28-degree angle of repose in roof, filled to a height 25 mm (1") below the eave height.
3. Bushel capacity is compacted 6%.

NOTES

1. Grain bin volumes and capacities based on ASAE S413.1 DEC97.
2. Volume based on 28-degree angle of repose in roof, filled to a height 25 mm (1") below the eave height.
3. Bushel capacity is compacted 6%.
