DIESEL FUEL BOSS™

The Diesel Fuel Boss™ is often referred to as the all-in-one unit. Each tank arrives assembled and ready to use. Equipped with a pump, hose and gun this diesel unit is a complete solution.

Featured Image (Above): 100 Gallon Diesel Fuel Boss™ (RDU100S10D)

No assembly required

Each Diesel Fuel Boss™ comes complete with a pump, hose and gun.

Protect your pump and components

Keep your expensive pump protected with the built-in pump cover.

Minimize downtime on site

The auto shut-off nozzle enable you to spend time on other tasks while refueling.

Easy to move it where you need it

These built-in easy lift handles allow you to load and unload your tank when required.

"When empty, it is light enough that I can load and unload from my pickup bed. Easy to fill, and transfer fuel to my tractor. I like it much better than a metal tank permanently taking up space in the pickup bed."

DIESEL FUEL BOSS™

Exploring my options, I came across this diesel fuel transfer tank. Wow. This is a nice well made piece of equipment. The pump is rated 10 gallons per minute so you get gas station like flow out of the gas station auto shut-off quality nozzle. The filler opening is large and has a removable screen to keep contaminants out. The power cord has no problem reaching the battery under the hood and I have a four door truck with a full size bed. The tank is nearly indestructible. It will never rust or corrode. It has a drain opening if needed.
