### ***Put more firefighting power in your truck box!***

The **QR225HP** Fire Suppression Skid mounts on the same compact skid as our pickup-ready Model QR150, but it's designed for extra volume. Responding to customer requests, we've increased the water capacity with a 225-gallon tank.

This unit includes 100 feet of 3/4" booster hose mounted on a 100' industrial cox reel, a 1 1/2" forestry coupler, and Scotty Firefighter fire nozzle with three foam sticks. Its Wildland high-pressure pump gives you the option of running two hoses at the same time for even more firefighting power.

### ***Extra Volume. Run two hoses at the same time!***

Due to tank dimensions, this model is not recommended or warranted for use on grain carts.
