300 IMP GAL TANK

WILDLAND HIGH PRESSURE PUMP / HONDA GX200

100' 1" FIRE HOSE ON AN INDUSTRIAL COX REEL

1 1/2" FORESTRY COUPLER

56" WIDE HEAVY DUTY 3/16" STEEL SKID

FORK POCKETS

OPTIONAL SCOTTY FIREFIGHTER NOZZLE WITH
FOAM CARTRIDGE

Fire prevention for rural communities looking to stop wildfires before they get out of control.

The QR300 is a mobile fire station mounted on a heavy-gauge skid with fork pockets for easy tractor or skid-steer loading onto a flat-deck truck.

Its 300-gallon water tank feeds a powerful high-pressure Wildland pump. Running at full RPM, this combo can hit flames with an 85 PSI spray. That's enough pressure to keep both a 1 1/2" forestry hose and 1" fire hose spraying at the same time.

Firefighter Inspired. Flaman built.

Ask us about additional add-ons, like an optional heavy-duty cage with plenty of storage for tools, hoses, and nozzles.
