Put more firefighting power in your truck box.

The **QR225** Fire Suppression Skid mounts on the same compact skid as our pickup-ready Model QR150, but it's designed for extra volume. Responding to customer requests, we've increased the water capacity with a 225-gallon tank.

This unit includes 100 feet of 3/4" booster hose mounted on a 100' industrial cox reel, a 1 1/2" forestry coupler, and Scotty Firefighter fire nozzle with three foam cartridges. Its Wildland high-pressure pump gives you the option of running two hoses at the same time for even more firefighting power.

Extra Volume. Run two hoses at the same time.

Due to tank dimensions, this model is not recommended or warrantied for use on grain carts.
