BATCO

BCX⁴

Gas

10" tube
15" belt
Up to 10,000 BPH
49' length

The BCX⁴ is built for farmers who want a conveyor they can count on every day. With a 40 HP EFI Vanguard engine and a heavy-duty gearbox mounted right to the drive roller, it delivers steady, reliable power with fewer moving parts to maintain. Drawing on proven UCX³ technology and farmer-driven updates, the BCX⁴ keeps grain moving smoothly while helping reduce wear, service time and operating costs.

Product line	BCX⁴ 1549 FMD GAS
Capacity	Up to 10000 bph
Tube gauge	12 ga
Belt type	15" wide Direct-X
Belt length	110' 8"
Lift	Hydraulic winch
Frame type	A-frame
Axle	2 ½" sq. x .188"
Hub	6-bolt on 6.0", 4.62" pilot
Tires	6-bolt ST205/ 75R15 6PL
Parking jack	7000 lbs rating, top twist 2 ½" receiver, 25" travel
Hopper dimensions	65 13⁄16" length x 31 ¼" width x 17 ⅜" height
Engine	Vanguard 40 HP EFI
Conveyor width (hub face to face)	86 ¾"
Conveyor weight	3750 lbs

Feature	Benefit	
Overhauled engine mount & heavy-duty gearbox drive	Reinforced drivetrain couples a heavy-duty gearbox directly to the drive roller providing consistent power with fewer wear parts for more uptime and less maintenance.	
Triple groove drive belts	Built to last under pressure. More grip, less wear and fewer replacements.	
40 HP EFI Vanguard engine	Reliable, efficient power keeps grain flowing smoothly across all commodities.	
AWD mover kit	Hydraulic drive to all tires makes moving and lining up the conveyor easier, especially in softer ground or tight approaches — and the 160° turning ability helps position it without extra maneuvering.	
Quick-disengage hydraulic pump	A service-friendly design that disconnect the pump quickly, making cold-weather starts and routine maintenance simpler and faster.	
New hydraulic tank & filter location	A smarter layout that improves oil flow in cold conditions and puts key service components where they're easier to reach, saving time on regular checks.	
Ergonomic battery access & side guard	Quick access to the battery and protected components means less hassle when boosting or inspecting — small touches that make daily operation smoother.	
Updated command center	A simple, clean control setup that can mount to either side, letting operators choose what works best for their yard layout and workflow.	
Direct X™ Belt with Edge Seal	Maintains a tight seal between the flashing for smoother grain flow and reduced spillage to improve efficiency across commodities.	
All-farm commodity system	Built-in cleaning tools — brush, scrapers and wash system keep the belt clean and service easy.	Lower profile collapsible hopper & handle	The compact, flexible hopper design makes it easier to get under different bin styles and allows more room to maneuver around tight yards.	
Heavy-duty hopper cloth liner	A rugged liner designed to handle the daily wear and nonstop use of busy farm days.	
Light kit	Standard with working light kit.
